Dear Friends and Cattle Producers,

On behalf of all the breeders involved in this sale, I would like to welcome you to Texas for The Fourth Annual Texas Wagyu Breeders Sale. I am proud to say that this is the best group of genetics that we have offered here at this event.

With the supply of cattle in this country narrowing due to recent weather patterns and other outside influences, our nation's cow herd is currently at lows not seen in fifty plus years. This provides us in the livestock industry with many opportunities. First, the demand and price for cattle is at an all time high, therefore we can all improve the quality of the U.S. cow herd and the quality of our beef by culling our lower end and older cows while receiving a fair price for them, and replacing them with younger and better genetics. Second, as we repopulate the nation's cow herd with higher performing and higher quality cattle, we should improve the consistency and thus the demand for beef. Truly there are great times ahead for the livestock industry.

The Wagyu Breed in particular is poised for the times by offering a great tasting product that is consistent in quality for today's consumers. This coupled with the added benefits of calving ease and maternal strengths make Wagyu a breed for cattle producers to use in progressive breeding programs.

The sale will once again be held at Tenroc Ranch, Salado, TX. This is a beautiful location in central Texas with plenty of sights to see and activities for the whole family. I look forward to seeing you all at the sale on April 13. In the meantime, if you have any questions, please do not hesitate to contact me.

Sincerely,

Robert Schacher
Robert Schacher

The Texas Wagyu Association is proud to host the following speakers at the Texas Wagyu Association General Meeting Friday, April 12, following a Wagyu Burger Lunch Sponsored by Triangle B Ranch at 12:00 NOON. Meeting at 1:00 PM.

Dustin Dean, PhD, *Sexing Technologies*
Dusty Abney, PhD, *Beef Specialist, Cargill Feed & Nutrition*

Followed by an auction of donated items and the general business meeting of the Texas Wagyu Association. Meeting will include the election of new board members.

Directions to Tenroc Ranch:

From I-35, take exit 284 and go west two miles and turn left into the Tenroc entrance. Once inside Tenroc entrance, go through gate to the right to get to the cattle events site.

RSC MS Hirashigefuku 2169 is a fine daughter of Hirashigetayasu J2351 and represents many of the traits that this great bull has to offer, with the look and volume of a great 001 daughter. She has Michifuku as her Dam's sire with Takazakura on the bottom. She has been flushed minimally, with good results. She sells open and ready to flush. She comes as a package with your choice of 3 straws of 002 Itomoritaka or (003) Kitateruyasudoi J2810. This cow and semen will provide some lucky buyer with a great blend of awesome Westholme genetics.

Black, Horned, Fullblood Cow

Birth Date: 02/26/10 Reg. No. FB11566

Consignor: TRIANGLE B RANCH

Itoshigefuji	Itojuji 483	Dai-Nana Itozakura Japanese Cow Itomichi
	Dai 30 Boboru Itoshigenami	Dai 10 Noboru 3 Shigeshigenami 10632 Fukuyuki Itomichi
CF502	Hikokura 1/10	Hikokura 1/7

1004X was produced from an embryo purchased from Mr. Shogo Takeda. The sire, Itoshigefuji TF147, is perhaps the largest Fullblood Wagyu bull weighing in excess of 2,400 pounds. TF147 is the result of Modoshikouhai (back crossing) with Itofuji, from the Fujimori line. Combining the Fujimori (supersized) and Itomichi line (good marbling) produced this bull with large frame size and good marbling. TF147 is well known for producing the best Fullblood Wagyu females. The dam of 1004X, CF502, was sired by Itoshigenami TF148 over an Itomichi sired daughter. TF148 has the highest percentage of Kumanami line genetics outside of Japan having a double cross of Shigekananami on his sire side plus another line through his maternal grandsire. TF148 is known for producing A5 carcasses with fine, white marbling. She is three months fresh and ready to flush!

	Dai 8 Marunami Itoshigenami	Shigeshigenami 10632 Fukuyuki CHR Takazakura 101L Utsukushii
JC Ms Itoshigenami 010	Takana 143	

Red Emperor made a splash on the entry of his genetics to the U.S. last year. Embryos he sired with a black dam topped the N.W. Wagyu Sale at \$2,000 each. His grandsires were ranked #1 and #3 in the Japanese Red Wagyu Registry with high marbling carcasses. Breedplan EPVs list him in the top 1% for scrotal size, 5% for milk, & 15% for 600 day wt. The donor is our high-Tajima #10. Her sire, TF Itoshigenami 148, is the only original import sire from the famous "Nami" line. 75% of his pedigree comes from this line, which some breeders regard as the best Tajima sub-strain because of the fineness of the marbling and meat texture. This is the same family that produced Suzutani, reputed to be the best cow to leave Japan. The other 25% of his pedigree comes from Japan's most famous bull, Itozakura. He ranks in the Breedplan top 5% for marbling and has one of the lowest birth weights. Donor's maternal bloodlines include Fujiko, whose cell line sold for \$26,000 in last year's sale. #10 produced twice the average on her last flush. This is a great opportunity to expand this powerful line without the F11 genetic disorder carried by 148. The resulting calves will offer the best of both worlds—marbling, muscling and feed efficiency and can be a starting point to breed up to a red herd. They are free by pedigree of Band 3, CL16, CHS, & F11. Donor will be on display during the sale.

42 FIVE FROZEN EMBRYOS

Consignor: CHISHOLM CATTLE CO.		
Shigefuku J1822	Dai 20 Hirashige 287	Kedaka 7212 Dai 13 Hirashige Hayanobu J9627 Kitafuji J1342299 Shigeshigenami 10632 Fukuyuki CHR Takazakura 101L Utsukushii
	Morikita J141042 Itoshigenami	
JC Ms Itoshigenami 009	Takana 143	

For balanced growth and marbling—attributes keenly sought by many breeders—the superior Kedaka female is seen as the breed pinnacle by traditional Japanese cattlemen", per the Australian Wagyu Forum. Thus it's not surprising that Kedaka calves now dominate Japanese feeder markets. The sire of these embryos, Shigefuku, is notable because...

- He is the only 100% Kedaka/Tottori foundation bull (next closest is 75%).
- He never left Japan. Only a small amount of semen was imported by the Westholme Group and sales in the U.S. have been highly restricted.
- Shigefuku was the outcross Kedaka bull to lift frame and weight gains when mated with Tajiri females, according to the Japanese advisers who helped Westholme select these genetics.
- With only one son and daughter registered with the AWA as of 2/1/13, his bloodline is one of the rarest in the U.S.

In the latest Breedplan EBVs, Shigefuku ranks in the top 5% for milk and scrotal size and in the top 10% for mature cow weight, while he has a lower BW than Michifuku.

The donor is our high-Tajima #9. Her sire, TF Itoshigenami 148, is the only original import sire from the famous "Nami" line. 75% of his pedigree comes from this line, which some breeders regard as the best Tajima sub-strain because of the fineness of the marbling and meat texture. This is the same family that produced Suzutani, reputed to be the best cow to leave Japan. The other 25% of his pedigree comes from Japan's most famous bull, Itozakura. He ranks in Breedplan's top 5% for marbling and has one of the lowest birth weights. Donor's maternal bloodlines include Fujiko, whose cell line sold for \$26,000 in last year's sale. Her sweet temperament has made her a herd favorite and she produced over 4 times the average on her last flush. This is a great opportunity to expand this powerful line without the F11 genetic disorder carried by 148. These embryos combine rare Kedaka genetics with the potent marbling of the "Nami" line and will help build a superior cow herd. Calves will be free by pedigree of Band 3, CL16, CHS, & F11. Donor will be on display during the sale.

Lot 43: Embryos will sell as one lot of eight. Itoshigenami (TF 148) is a carrier of F11.

		Suzutani
	Suzutaka 2	

The dam of the embryos, Suzito, is a maternal granddaughter of the incomparable Suzutani. Suzito's dam is a maternal sister to Wagyu breed greats Sanjiro and Shigeshigetani. Suzito is a daughter of arguably the best bull to come from the great Takeda Farms breeding program, Itozuru doi 151. This makes her a full sister to the popular new bull Ichiro. She is a rare and unique cow in that she is a daughter of 151 and maternal granddaughter of Suzutani plus she is recessive-free. The embryos in this lot are special in that they are sired by the exceptional bull Shigeshigetani, bringing in a paternal cross to Suzutani also. A truly special opportunity to invest in the Suzutani maternal line.

Embryo's Sired by Stonyrun ID 151 Ichiro1 (FB11842), the son of Itozoru Doi (FB3685) and daughter of Suzutaka 2 (FB6032), these bulls genetics are very rare and highly sought after. The Dam is our favorite, Akemi (FB7612) who is a Mazda daughter and passes on her Kedaka traits. This is our First offering of this cows rare genetics, and as far as we know, this mating is unique and has not been duplicated. This mating is designed to produce offspring with excellent size, good muscling and cows that produce lots of milk for larger calves. The dam has an excellent disposition and maternal instincts, and is larger than the average Wagyu cow. She has a huge spring of ribs, produces lots of milk, and calves are the best I have seen. This offering is a tremendous opportunity for the buyer.

DAM OF LOT 50

THE STEAKS ARE HIGH *semen*

51 TBR ITOSHIGEFUKU 9059W SEMEN

Black, Horned, Fullblood Bull

Birth Date: 11/11/09 **Reg. No.** FB11166

Consignor: TRIANGLE B RANCH

Itoshigefuji	Itoguji 483	Dai-Nana Itozakura Japanese Cow Itomichi
	Dai 30 Boboru Kimifuku 3	Dai 10 Noboru 3 Tanifuku Doi 1606 Yukufuku Itomichi
TF 713	Hikokura 1/10	Hikokura 1/7

9059W was produced from an embryo purchased from Mr. Shogo Takeda. The sire, Itoshigefuji TF147, is perhaps the largest Fullblood Wagyu bull weighing in excess of 2,400 pounds. TF147 is the result of Modoshikouhai (back crossing) with Itofuji, from the Fujimori line. Combining the Fujimori (supersized) and Itomichi line (good marbling) produced this bull with large frame size and good marbling. TF147 is well known for producing the best Fullblood Wagyu females. The dam of 9059W, TF 713, is a daughter of Kimifuku 3 (sired by Tanifuku doi) and an Itomichi daughter. Kimifuku 3 is the highest marbling bull Mr. Shogo Takeda raised in his lifetime. The resulting bull, 9059W, is a Group C bull and is proving to be an excellent bull to produce top quality Fullblood Wagyu females. We are also using him to produce F1 feeder cattle.

Semen is stored at Hawkeye Breeders in Adel, Iowa and is CSS qualified.

CHR Ms Sanjirou 315	MJB Ms Kitafuku 05K	JVP Fukutsuru-068 CHR Ms Kitaguni 037H

A fine Kalanga Red Star son with Sanjirou genetics. The conformation of the reds and the marbling of the blacks makes the best offering for F1 production. The new blood of the reds is a great injection into the Takeda rotation breeding system for genetic diversity of the limited black pool.

54 HW SHIGEFUJI 06Z

Black, Horned, Fullblood Bull

Birth Date: 03/15/12 Reg. No. FB13860

Consignor: SUTTON CREEK CATTLE CO. LLC

Shigesigetani	Haruki-2	Monjiro Sakura 2 741638 Tanishige 1526
	Suzutani CHR Takazakura 101L	Suzunami 472255 Takazakura CHR Kikuhanaime
Takana 143	Utsukushii	Michifuku Fujiko

Free of all recessive disorders by pedigree and tested free of PI-BVD. Halter broke, very gentle disposition. Horns surgically removed. Excellent prospect for a breeding or show bull.

55 YAKITOMICHI 766T-0748

Black, Horned, Fullblood Bull
